

Peace of mind

The world is a richer place, but also more security challenged than ever before. SenseMatic adds peace of mind with the latest in Internet of Things

- Latest Technology – Internet of Things
- Remote observation from a mobile App, or any internet connection
- Security alerts tailored for your needs – by hour, by event or a mix of both
- Cameras and Sensors that require no wires – neither for power, nor for communication
- Ready to go within hours of you feeling the need
- Meant for the occasion – add that extra security when on Holidays or an important event such as a marriage
- 24x7 Remote Monitoring – we place your house under 24x7 surveillance, assuring complete privacy even from the professionals watching the house

SenseMatic delivers complete peace of mind in the fastest possible time at the lowest possible price.

In Control

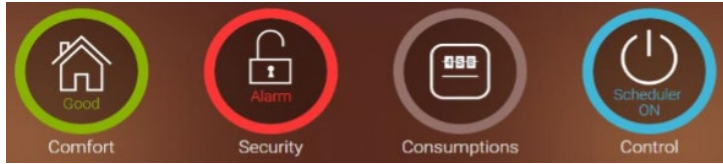

With Energy costs spiraling up, and environmental damage visible for everyone to see, energy management is not just a money saving option, it is also a responsibility

- Monitor, predict and control energy expenditure
- Manage and configure using an automation tool, allowing for example, turning on and off lighting circuits, appliances & equipment.
- Secure cloud based platform that allows control from a beautiful Mobile Phone App or an easy to use Web Page

Value for Money

Sensorise assures you of the lowest price and the greatest value from your investments in security and control. We offer a host of options and choices with payment plans that suit every budget and pocket

- Plans for Outright Purchase with support
- Monthly Fees based plans
- Event based Plans

Peace of Mind,
In Control,
Value for Money
